

SAFETY DATA SHEET Synthetic Air Tool Oil

According to Appendix D, OSHA Hazard Communication Standard 29 CFR §1910.1200 and WHMIS 2015, in compliance with the Hazardous Product Act (HPA, as amended) and the requirements of the Hazardous Product Regulations (HPR).

1. Identification		
Product identifier		
Product name	Synthetic Air Tool Oil	
Product number	AIR	
Recommended use of the che	emical and restrictions on use	
Application	Lubricating oil.	
Uses advised against	Avoid the formation of mists.	
Details of the supplier of the s	afety data sheet	
Supplier	AMSOIL INC. Bordner, Ladner, Gervais Scotia Plaza, 40 King St W Toronto, ON, Canada M5H 3Y4 T: +1 416-367-6547	
Manufacturer	AMSOIL INC. One AMSOIL Center, Superior, WI 54880, USA. T: +1 715-392-7101	
Emergency telephone number	<u>r</u>	
Emergency telephone	CHEMTREC: Within USA and Canada: 1-800-424-9300 Outside the USA and Canada: +1 703-741-5970 (collect calls accepted) 24/7	
2. Hazard(s) identification		
Classification of the substance	e or mixture	
OSHA/WHMIS Regulatory Status	This Product is not Hazardous under the OSHA Hazard Communication Standard and according to the hazard criteria of the Hazardous Product Regulations.	
Physical hazards	Not Classified	
Health hazards	Not Classified	
Environmental hazards	Not Classified	
Label elements		
Hazard statements	NC Not Classified	
Precautionary statements	P102 Keep out of reach of children.	
Other hazards		
This product does not contain any substances classified as PBT or vPvB.		

3. Composition/information on ingredients

Mixtures

Γ

Synthetic Air Tool Oil

Hydrogenated base oil	10 - <25%
CAS number: 64742-54-7	
Classification Asp. Tox. 1 - H304	
The full text for all hazard statements is displayed in Section 16.	
4. First-aid measures	

Description of first aid measures			
General information	Get medical attention immediately. Show this Safety Data Sheet to the medical personnel.		
Inhalation	Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Maintain an open airway. Loosen tight clothing such as collar, tie or belt.		
Ingestion	Rinse mouth thoroughly with water. Give a few small glasses of water or milk to drink. Stop if the affected person feels sick as vomiting may be dangerous. Do not induce vomiting unless under the direction of medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Place unconscious person on their side in the recovery position and ensure breathing can take place. Maintain an open airway. Loosen tight clothing such as collar, tie or belt.		
Skin Contact	Wash with plenty of soap and water. Get medical attention if symptoms are severe or persist after washing.		
Eye contact	Rinse immediately with plenty of water. Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 20 minutes.		
Protection of first aiders	First aid personnel should wear appropriate protective equipment during any rescue.		
Most important symptoms and effects, both acute and delayed			
General information	See Section 11 for additional information on health hazards. The severity of the symptoms described will vary dependent on the concentration and the length of exposure.		
Inhalation	Prolonged inhalation of high concentrations may damage respiratory system.		
Ingestion	Gastrointestinal symptoms, including upset stomach. Fumes from the stomach contents may be inhaled, resulting in the same symptoms as inhalation.		
Skin contact	Prolonged contact may cause dryness of the skin.		
Eye contact	May cause temporary eye irritation.		
Indication of immediate medical attention and special treatment needed			
Notes for the doctor	Treat symptomatically.		
5. Fire-fighting measures			
Extinguishing media			
Suitable extinguishing media	The product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.		

Unsuitable extinguishing Do not use water jet as an extinguisher, as this will spread the fire.

Special hazards arising from the substance or mixture

media

Specific hazards	Containers can burst violently or explode when heated, due to excessive pressure build-up. Contains Hydrocarbons. The product is immiscible with water and will spread on the water surface.			
Hazardous combustion products	Hydrocarbons. Carbon monoxide (CO). Carbon dioxide (CO2).			
Advice for firefighters				
Protective actions during firefighting	Avoid breathing fire gases or vapors. Evacuate area. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. If a leak or spill has not ignited, use water spray to disperse vapors and protect men stopping the leak. Control run-off water by containing and keeping it out of sewers and watercourses. If risk of water pollution occurs, notify appropriate authorities.			
Special protective equipment for firefighters	Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Standard Firefighter's clothing including helmets, protective boots and gloves will provide a basic level of protection for chemical incidents.			
6. Accidental release measure	PS			
Personal precautions, protecti	ve equipment and emergency procedures			
Personal precautions	No action shall be taken without appropriate training or involving any personal risk. Keep unnecessary and unprotected personnel away from the spillage. Wear protective clothing as described in Section 8 of this safety data sheet. Follow precautions for safe handling described in this safety data sheet. Wash thoroughly after dealing with a spillage. Use protective equipment appropriate for surrounding materials.			
Environmental precautions				
Environmental precautions	Immiscible with water. Aquatic toxicity is unlikely to occur. However, large or frequent spills may have hazardous effects on the environment. Absorb spillage with non-combustible, absorbent material. Large Spillages: Inform the relevant authorities if environmental pollution occurs (sewers, waterways, soil or air).			
Methods and material for cont	ainment and cleaning up			
Methods for cleaning up	Wear protective clothing as described in Section 8 of this safety data sheet. Clear up spills immediately and dispose of waste safely. Reuse or recycle products wherever possible. Absorb spillage with sand or other inert absorbent. Collect and place in suitable waste disposal containers and seal securely. Flush contaminated area with plenty of water. Wash thoroughly after dealing with a spillage. Dispose of contents/container in accordance with national regulations.			
Reference to other sections	For personal protection, see Section 8. See Section 11 for additional information on health hazards. See Section 12 for additional information on ecological hazards. For waste disposal, see Section 13.			
7. Handling and storage				
Precautions for safe handling				
Usage precautions	Read and follow manufacturer's recommendations. Wear protective clothing as described in Section 8 of this safety data sheet. Keep away from food, drink and animal feeding stuffs. Handle all packages and containers carefully to minimize spills. Keep container tightly sealed when not in use. Avoid the formation of mists. Do not reuse empty containers. Avoid contact with used product.			

Advice on general occupational hygiene	Wash promptly if skin becomes contaminated. Take off contaminated clothing and wash before reuse. Wash contaminated clothing before reuse. Do not eat, drink or smoke when using this product. Wash at the end of each work shift and before eating, smoking and using the toilet. Change work clothing daily before leaving workplace.		
Conditions for safe storage, ir	cluding any incompatibilities		
Storage precautions	Store away from incompatible materials (see Section 10). Keep only in the original container. Keep container tightly closed, in a cool, well ventilated place. Keep containers upright. Protect containers from damage.		
Storage class	Chemical storage.		
Specific end uses(s)			
Specific end use(s)	The identified uses for this product are detailed in Section 1.		
8. Exposure Controls/persona	I protection		
Control parameters Occupational exposure limits Under conditions which may of Long-term exposure limit (8-h Short-term exposure limit (15-			
Ingredient comments	The product contains no other substances classified as hazardous to health by an OEL value in concentrations which should be taken into account.		
Exposure controls			
Appropriate engineering controls	Provide adequate ventilation. Good general ventilation should be adequate to control worker exposure to airborne contaminants.		
Eye/face protection	Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Personal protective equipment for eye and face protection should comply with OSHA 1910.133. Unless the assessment indicates a higher degree of protection is required, the following protection should be worn: Tight-fitting safety glasses.		
Hand protection	Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible. The most suitable glove should be chosen in consultation with the glove supplier/manufacturer, who can provide information about the breakthrough time of the glove material. To protect hands from chemicals, gloves should comply with OSHA 1910.138 and be demonstrated to be impervious to the chemical and resist degradation. Considering the data specified by the glove manufacturer, check during use that the gloves are retaining their protective properties and change them as soon as any deterioration is detected. Frequent changes are recommended.		
Other skin and body protection	Appropriate footwear and additional protective clothing complying with an approved standard should be worn if a risk assessment indicates skin contamination is possible.		
Hygiene measures	Provide eyewash station and safety shower. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reuse. Clean equipment and the work area every day. Good personal hygiene procedures should be implemented. Wash at the end of each work shift and before eating, smoking and using the toilet. When using do not eat, drink or smoke.		
Respiratory protection	Respiratory protection complying with an approved standard should be worn if a risk assessment indicates inhalation of contaminants is possible. Provide adequate ventilation. Large Spillages: If ventilation is inadequate, suitable respiratory protection must be worn.		

Environmental exposure Keep container tightly sealed when not in use. controls

9. Physical and Chemical Properties		
Information on basic physical and chemical properties		
Appearance	Liquid.	
Color	Straw.	
Odor	Mild hydrocarbon.	
Odor threshold	Not available.	
рН	Not available.	
Melting point	Not available.	
Initial boiling point and range	Not available.	
Flash point	250°C Cleveland open cup., [ASTM D92]	
Evaporation rate	Not available.	
Upper/lower flammability or explosive limits	Not available.	
Vapor pressure	Not available.	
Vapor density	Not available.	
Relative density	0.8478	
Solubility(ies)	Not known.	
Partition coefficient	Not available.	
Auto-ignition temperature	Not available.	
Decomposition Temperature	Not available.	
Viscosity	32.5 cSt @ 40°C 6.2 cSt @ 100°C [ASTM D 445]	
Explosive properties	Not considered to be explosive.	
Oxidizing properties	Does not meet the criteria for classification as oxidizing.	
Fire point	270°C Cleveland open cup., [ASTM D92]	
Pour point	-46°C [ASTM D 97]	
10. Stability and reactivity		
Reactivity	See the other subsections of this section for further details.	
Stability	Stable at normal ambient temperatures and when used as recommended. Stable under the prescribed storage conditions.	
Possibility of hazardous reactions	No potentially hazardous reactions known.	

Conditions to avoid There are no known conditions that are likely to result in a hazardous situation.

Materials to avoid	No specific material or group of materials is likely to react with the product to produce a hazardous situation.		
Hazardous decomposition products	Does not decompose when used and stored as recommended. Thermal decomposition or combustion products may include the following substances: Harmful gases or vapors.		
11. Toxicological information			
Information on toxicological eff	fects		
Toxicological effects	Not regarded as a health hazard under current legislation.		
Acute toxicity - oral Notes (oral LD₅₀)	Based on available data the classification criteria are not met.		
Acute toxicity - dermal Notes (dermal LD ₅₀)	Based on available data the classification criteria are not met.		
Acute toxicity - inhalation Notes (inhalation LC ₅₀)	Based on available data the classification criteria are not met.		
Skin corrosion/irritation Animal data	Based on available data the classification criteria are not met.		
Serious eye damage/irritation Serious eye damage/irritation	Based on available data the classification criteria are not met.		
Respiratory sensitization Respiratory sensitization	Based on available data the classification criteria are not met.		
Skin sensitization Skin sensitization	Based on available data the classification criteria are not met.		
Germ cell mutagenicity Genotoxicity - in vitro	Based on available data the classification criteria are not met.		
Carcinogenicity Carcinogenicity	Based on available data the classification criteria are not met.		
IARC carcinogenicity	None of the ingredients are listed or exempt.		
Reproductive toxicity Reproductive toxicity - fertility	Based on available data the classification criteria are not met.		
Reproductive toxicity - development	Based on available data the classification criteria are not met.		
Specific target organ toxicity -			
STOT - single exposure	Not classified as a specific target organ toxicant after a single exposure.		
Specific target organ toxicity -			
STOT - repeated exposure	Not classified as a specific target organ toxicant after repeated exposure.		
Aspiration hazard Aspiration hazard	Based on available data the classification criteria are not met.		
General information	No specific health hazards known. The severity of the symptoms described will vary dependent on the concentration and the length of exposure.		

Inhalation	Prolonged inhalation of high concentrations may damage respiratory system.		
Ingestion	Gastrointestinal symptoms, including upset stomach. Fumes from the stomach contents may be inhaled, resulting in the same symptoms as inhalation.		
Skin Contact	Prolonged contact may cause dryness of the skin.		
Eye contact	May cause temporary eye irritation.		
Route of exposure	Ingestion Inhalation Skin and/or eye contact		
Target Organs	No specific target organs known.		
Medical considerations	Skin disorders and allergies.		

Toxicological information on ingredients.

Acute toxicity - oral

Hydrogenated base oil

	Acute toxicity - orai	
	Notes (oral LD ₅₀)	LD₅₀ >5000 mg/kg, Oral, Rat REACH dossier information.
	Acute toxicity - dermal	
	Notes (dermal LD₅₀)	LD₅₀ >5000 mg/kg, Dermal, Rabbit REACH dossier information.
	Acute toxicity - inhalation	
	Notes (inhalation LC₅₀)	LC_{50} >5.53 mg/l, Inhalation, Rat REACH dossier information.
	Skin corrosion/irritation	
	Animal data	Dose: 0.5ml, 24 hours, Rabbit Erythema/eschar score: No erythema (0). Edema score: No oedema (0). REACH dossier information.
	Serious eye damage/irritati	ion
	Serious eye damage/irritation	Dose: 0.1ml, 72 hours, Rabbit REACH dossier information.
	Skin sensitization	
	Skin sensitization	Buehler test - Guinea pig: Not sensitizing. REACH dossier information.
	Germ cell mutagenicity	
	Genotoxicity - in vitro	Gene mutation: Negative. REACH dossier information.
	Genotoxicity - in vivo	Chromosome aberration: Negative. REACH dossier information.
	Reproductive toxicity	
	Reproductive toxicity - fertility	Screening - NOAEL > 1000 mg/kg/day, Oral, Rat P REACH dossier information.
	Reproductive toxicity - development	Developmental toxicity: - LOAEL: 125 mg/kg/day, Dermal, Rat REACH dossier information.
12. Ecologic	al Information	
Ecotoxicity	Not read	arded as dangerous for the environment. However, large or frequent spills may have

Ecotoxicity

Not regarded as dangerous for the environment. However, large or frequent spills may have hazardous effects on the environment.

Toxicity

Based on available data the classification criteria are not met.

Ecological information on ingredients.

Hydrogenated base oil

	Acute aquatic to	kicity	
	Acute toxicity - fish		LL₅₀, 96 hours: > 100 mg/l, Pimephales promelas (Fat-head Minnow)
	Acute toxicity - ad invertebrates	quatic	EL₅₀, 48 hours: > 10000 mg/l, Daphnia magna
	Acute toxicity - a plants	quatic	NOEL, 72 hours: > 100 mg/l, Pseudokirchneriella subcapitata
Persistence	and degradability		
Persistence	and degradability	The deg	radability of the product is not known.
Ecological in	nformation on ingre	edients.	
			Hydrogenated base oil
	Biodegradation		Water - Degradation 31: 28 days Inherently biodegradable.
Bioaccumul	ative potential		
Bio-Accumu	ulative Potential	No data	available on bioaccumulation.
Partition coe	efficient	Not avai	lable.
