

SAFETY DATA SHEET Dirt Bike SAE 10W-40, SAE 10W-50, SAE 10W-60

According to Appendix D, OSHA Hazard Communication Standard 29 CFR §1910.1200 and WHMIS 2015, in compliance with the Hazardous Product Act (HPA, as amended) and the requirements of the Hazardous Product Regulations (HPR).

| 1. Identification | | |
|---|---|--|
| | | |
| Product identifier | | |
| Product name | Dirt Bike SAE 10W-40, SAE 10W-50, SAE 10W-60 | |
| Product number | DB40, DB50, DB60 | |
| Recommended use of the chemical and restrictions on use | | |
| Application | Lubricating oil. | |
| Uses advised against | Avoid the formation of mists. | |
| Details of the supplier of the s | afety data sheet | |
| Supplier | AMSOIL INC. Bordner, Ladner, Gervais Scotia Plaza, 40 King St W Toronto, ON, Canada M5H 3Y4 T: +1 416-367-6547 | |
| Manufacturer | AMSOIL INC. One AMSOIL Center, Superior, WI 54880, USA. T: +1 715-392-7101 | |
| Emergency telephone numbe | <u>r</u> | |
| Emergency telephone | CHEMTREC: Within USA and Canada: 1-800-424-9300 Outside the USA and Canada: +1 703-741-5970 (collect calls accepted) 24/7 | |
| 2. Hazard(s) identification | | |
| Classification of the substance | e or mixture | |
| OSHA/WHMIS Regulatory Status | This Product is not Hazardous under the OSHA Hazard Communication Standard and according to the hazard criteria of the Hazardous Product Regulations. | |
| Physical hazards | Not Classified | |
| Health hazards | Not Classified | |
| Environmental hazards | Not Classified | |
| Label elements | | |
| Hazard statements | NC Not Classified | |
| Other hazards | | |
| This product does not contain any substances classified as PBT or vPvB. | | |
| 0. Oceano citize finformation en insendiente | | |

3. Composition/information on ingredients

Mixtures

| Hydrogenated base oil | 2.5 - <5% |
|---|---|
| CAS number: 64742-54-7 | |
| Classification Asp. Tox. 1 - H304 | |
| The full text for all hazard state | ements is displayed in Section 16. |
| 4. First-aid measures | |
| Description of first aid measur | es |
| General information | Get medical attention if any discomfort continues. Show this Safety Data Sheet to the medical personnel. |
| Inhalation | Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Maintain an open airway. Loosen tight clothing such as collar, tie or belt. |
| Ingestion | Rinse mouth thoroughly with water. Remove any dentures. Give a few small glasses of water or milk to drink. Stop if the affected person feels sick as vomiting may be dangerous. Do not induce vomiting unless under the direction of medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. Maintain an open airway. Loosen tight clothing such as collar, tie or belt. |
| Skin Contact | Remove affected person from source of contamination. Rinse immediately with plenty of water. |
| Eye contact | Rinse immediately with plenty of water. Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 10 minutes. |
| Protection of first aiders | First aid personnel should wear appropriate protective equipment during any rescue. |
| Most important symptoms and | effects, both acute and delayed |
| General information | See Section 11 for additional information on health hazards. The severity of the symptoms described will vary dependent on the concentration and the length of exposure. |
| Inhalation | Prolonged inhalation of high concentrations may damage respiratory system. |
| Ingestion | Gastrointestinal symptoms, including upset stomach. Fumes from the stomach contents may be inhaled, resulting in the same symptoms as inhalation. |
| Skin contact | Prolonged contact may cause dryness of the skin. |
| Eye contact | May cause temporary eye irritation. |
| Indication of immediate medic | al attention and special treatment needed |
| Notes for the doctor | Treat symptomatically. |
| Specific treatments | No special treatment required. |
| 5. Fire-fighting measures | |
| Extinguishing media | |
| Suitable extinguishing media | The product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire. |
| Unsuitable extinguishing media | Do not use water jet as an extinguisher, as this will spread the fire. |

Special hazards arising from the substance or mixture

| Hazardous combustion Thermal decomposition or combustion products may include the following substances: Harmful gases or vapors. Advice for firefighters Protective actions during firefighting Protective actions during Avoid breathing fire gases or vapors. Evacuate area. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to fiames with water until well after the fire is out. If a leak or spill has not ignited, use water spray to disperse vapors and protect men stopping the leak. Special protective equipment for firefighters Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective cothing. Standard Firefighter's clothing including helmets, protective bods and gaves, that movides a basic level of protection during chemical incidents is defined by the Canada Cocupational Health and Safety Regulations, by provincial guidelines on occupational health and safety or by NFPA standards if applicable. 6. Accidential release measures: Personal precautions No action shall be taken without appropriate training or involving any personal risk. Keep unnecessary and unprotected personnel away from the spillage. Use protective equipment appropriate for surrounding materials. Environmental precautions Avoid discharge to the aquatic environment. Methods for cleaning up Wear protective clothing as described in Section 8 of this safety data sheet. Clear up spills immediately and dispose of vaste safety. Reuse or recycle products where reposale. Reference to other sections | Specific hazards | Containers can burst violently or explode when heated, due to excessive pressure build-up. Contains Hydrocarbons. The product is immiscible with water and will spread on the water surface. |
|--|---------------------------------|--|
| Protective actions during firefighting Avoid breathing fire gases or vapors. Evacuate area. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to finames with water until wall after the fire is cut. If a leak or spill has not ignited, use water spray to disperse vapors and protect men stopping the leak. Special protective equipment for firefighters Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Standard Firefighter's clothing including helmets, protective boots and gloves, that provides a basic level of protection during chemical incidents is defined by the Canada Occupational Health and Safety Regulations, by provincial guidelines on occupational health and safety or by NFPA standards if applicable. 6. Accidental release measures Personal precautions, protective equipment and emergency procedures Personal precautions, protective equipment and emergency procedures No action shall be taken without appropriate training or involving any personal risk. Keep unnecessary and unprotected personnel away from the spillage. Wear protective clothing as described in this safety data sheet. Follow precautions for safe handling described in this safety data sheet. Follow precautions for safe handling described in this safety data sheet. Follow precautions for safe handling immediately and dispose of waste safely. Reuse or recycle products wherever possible. Absorb the spillage with an inst. dry material and place it in a suitable waste disposal container. Flush containniated area with plenty of water. Wash thoroughly after dealing with a spillage. Dispose of onentris/container in accordance with national regulations. Reference to other sections F | | |

| Specific end uses(s) | | | |
| Specific end use(s) | The identified uses for this product are detailed in Section 1. | | |
| 8. Exposure Controls/persona | I protection | | |
| Control parameters Occupational exposure limits Under conditions which may g | enerate mists, the following exposure limits are recommended: | | |
| Long-term exposure limit (8-he Short-term exposure limit (15- | | | |
| Ingredient comments | The product contains no other substances classified as hazardous to health by an OEL value in concentrations which should be taken into account. | | |
| Exposure controls | | | |
| Appropriate engineering controls | Provide adequate ventilation. Good general ventilation should be adequate to control worker exposure to airborne contaminants. | | |
| Eye/face protection | Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Personal protective equipment for eye and face protection should comply with OSHA 1910.133 and/or the Canadian regulation on health and safety at work, SOR/86-304, Part XII (12.6), and any relevant provincial regulation relating to health and safety at work. The following protection should be worn: Chemical splash goggles. | | |
| Hand protection | Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible. The most suitable glove should be chosen in consultation with the glove supplier/manufacturer, who can provide information about the breakthrough time of the glove material. To protect hands from chemicals, gloves should comply with OSHA 1910.138 and/or the Canadian regulation on health and safety at work, SOR/86-304, Part XII (12.9), and be demonstrated to be impervious to the chemical and resist degradation. Considering the data specified by the glove manufacturer, check during use that the gloves are retaining their protective properties and change them as soon as any deterioration is detected. Frequent changes are recommended. | | |
| Other skin and body protection | Appropriate footwear and additional protective clothing complying with an approved standard should be worn if a risk assessment indicates skin contamination is possible. | | |
| Hygiene measures | Provide eyewash station and safety shower. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reuse. Clean equipment and the work area every day. Good personal hygiene procedures should be implemented. Wash at the end of each work shift and before eating, smoking and using the toilet. When using do not eat, drink or smoke. | | |
| Respiratory protection | Respiratory protection complying with an approved standard should be worn if a risk assessment indicates inhalation of contaminants is possible. Provide adequate ventilation. Large Spillages: If ventilation is inadequate, suitable respiratory protection must be worn. | | |
| Environmental exposure controls | Not regarded as dangerous for the environment. | | |

| 11. Toxicological information | |
|---|---|
| Hazardous decomposition products | Does not decompose when used and stored as recommended. Thermal decomposition or combustion products may include the following substances: Harmful gases or vapors. |
| Materials to avoid | No specific material or group of materials is likely to react with the product to produce a hazardous situation. |
| Conditions to avoid | There are no known conditions that are likely to result in a hazardous situation. |
| Possibility of hazardous reactions | No potentially hazardous reactions known. |
| Stability | Stable at normal ambient temperatures and when used as recommended. Stable under the prescribed storage conditions. |
| Reactivity | See the other subsections of this section for further details. |
| 10. Stability and reactivity | |
| Pour point | -38 - (-44)°C [ASTM D 97] |
| Fire point | 254 - 258°C Cleveland open cup. [ASTM D 92] |
| Oxidizing properties | Does not meet the criteria for classification as oxidizing. |
| Explosive properties | Not considered to be explosive. |
| /iscosity | 93.5 - 160.1 cSt @ 40°C 14.2 - 23.5 cSt @ 100°C [ASTM D 445] |
| Decomposition Temperature | Not available. |
| uto-ignition temperature | Not available. |
| Partition coefficient | Not available. |
| Solubility(ies) | Not known. |

| 12. Ecologic | cal Information | |
| Ecotoxicity | y Not regarded as dangerous for the environment. However, large or frequent spills may have hazardous effects on the environment. | |
| Toxicity | Based on available data the classification criteria are not met. | |
| Ecological in | nformation on ingredients. | |
| | | Hydrogenated base oil |
| | Acute aquatic toxicity | |
| | Acute toxicity - fish | LL₅₀, 96 hours: > 100 mg/l, Pimephales promelas (Fat-head Minnow) |
| | Acute toxicity - aquatic invertebrates | EL₅₀, 48 hours: > 10000 mg/l, Daphnia magna |
| | Acute toxicity - aquatic plants | NOEL, 72 hours: > 100 mg/l, Pseudokirchneriella subcapitata |
| | | Hydrogenated base oil |
| | Acute aquatic toxicity | |
| | Acute toxicity - fish | LL₅₀, 96 hours: > 100 mg/l, Pimephales promelas (Fat-head Minnow) |
| | Acute toxicity - aquatic invertebrates | EL₅₀, 48 hours: > 10000 mg/l, Daphnia magna |
| | Acute toxicity - aquatic plants | NOEL, 72 hours: > 100 mg/l, Pseudokirchneriella subcapitata |
| Persistence | and degradability | |
| Persistence | and degradability The deg | radability of the product is not known. |
| Ecological in | nformation on ingredients. | |
| | | Hydrogenated base oil |
| | Biodegradation | Water - Degradation 31: 28 days Inherently biodegradable. |

Hydrogenated base oil

| Biodegradation | Water - Degradation 31: 28 days Inherently biodegradable. |
|---|---|
| Bioaccumulative potential | |
| Bio-Accumulative Potential | No data available on bioaccumulation. |
| Partition coefficient | Not available. |
| Mobility in soil | |
| Mobility | No data available. |
| Other adverse effects | |
| Other adverse effects | None known. |
| 13. Disposal considerations | |
| Waste treatment methods | |
| General information | The generation of waste should be minimized or avoided wherever possible. Reuse or recycle products wherever possible. This material and its container must be disposed of in a safe way. Disposal of this product, process solutions, residues and by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any local authority requirements. |
| Disposal methods | Dispose of surplus products and those that cannot be recycled via a licensed waste disposal contractor. Waste packaging should be collected for reuse or recycling. Incineration or landfill should only be considered when recycling is not feasible. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of the local water authority. |
| 14. Transport information | |
| | |
| General | The product is not covered by international regulations on the transport of dangerous goods (IMDG, IATA, DOT, TDG). |
| General <u>UN Number</u> | |
| | |
| UN Number | |
| <u>UN Number</u> Not applicable. | |
| <u>UN Number</u> Not applicable. <u>UN proper shipping name</u> | |
